

DEFENCE VISION SYSTEMS

10 Years Experience Designing and Manufacturing Military Standard Cameras and Imaging Systems

SWIR cameras

Available in 320x256 and 640x512 pixels formats
Minimum exposure time down to 500ns for active imaging.
Extended spectral response from 1200nm to 2200nm
24 hour capability, working over 900nm to 1700nm

EMCCD COLOUR cameras

640x480 pixels format with automatic blur suppression
High sensitivity. Operating range: full sunlight to starlight

EMCCD Monochrome cameras

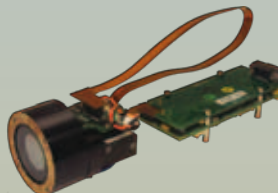

1004x1000 pixels format, digital and analogue output
24 hour capability, working over 400nm to 1000nm
Provides monochrome images from full daylight down to starlight

Micro ICCD cameras

Extended dynamic range coverage
24 hour capability, working over 400nm to 900nm
Provides monochrome images from full daylight down to starlight

MULTISPECTRAL PANORAMIC Camera

Multiplexed acquisition platform
Allows a simultaneous acquisition with
up to eight SWIR/Colour sensors delivering
simultaneous multispectral panoramic images

Visit us on stand F01 at EUROSATORY 14–18 June Paris
